Deployment	: Project Deployment, cPanel Hosting, Shared Hosting, Environment Setup
Tools	: Git, GitHub, Postman, Composer, NPM, Vite, VScode
Soft Skills	: Problem Solving, Team Collaboration, Analytical Thinking, Adaptability
Concepts	: SOLID Principles, Clean Code, CRUD, Responsive UI, Web Security Basics

Experience

•Millennium Solution

IT Engineer & Software Developer January, 2025 - Present

– Worked as a Software Developer and Technical Support Engineer, responsible for developing custom websites and software solutions based on client requirements.

– Provided technical support and training on TallyPrime, including installation, configuration, troubleshooting, data migration, backup, and restoration.

– Collaborated with the development team to identify and resolve software issues while contributing to process improvements. Delivered both remote and on-site support, ensuring timely issue resolution and improved customer satisfaction.

•Premier University Computer Club

Developer July, 2024 - December, 2024

– Worked as a Web Developer for 6 months, contributing to the development and maintenance of club-related web applications and digital platforms. Responsible for implementing new features, improving UI/UX, and ensuring responsive design across devices. Collaborated with team members to manage projects efficiently and support technical requirements for club activities and events.

Projects

•Nurjahan Store — E-Commerce Platform Source | Live

– Developed a complete e-commerce platform featuring product management, category management, inventory tracking, shopping cart, order processing, customer management, payment integration, and REST API services. Built with React.js for the frontend and Laravel for the backend, ensuring a responsive, secure, and user-friendly experience.

•Online Traffic Offense Management System – (Web & App) Source | Live

– Developed a web-based traffic offense management system using Laravel Blade for the web interface and Laravel REST APIs for mobile application integration. The system includes traffic violation reporting, fine management, offender record tracking, user authentication, and administrative monitoring. Also developed a Flutter mobile application connected through REST APIs to provide a seamless user experience across platforms.

•Millennium Solution — Corporate Website Source | Live

– Developed a modern, responsive corporate landing website to showcase company services, projects, and business identity. The platform focuses on clean UI/UX design, smooth navigation, and performance optimization to ensure a professional digital presence. Built with a responsive frontend structure to support all devices and improve user engagement.
